

THE LEAD UP TO WESAK

by Michael King

You may be aware we are now in the lead up to the inner plane Festival of the Christ and Wesak. This is like the New Year on the inner planes. Testing in these times is quite intense.

All those consciously on the spiritual and ascension paths have an opportunity to demonstrate to the God Within, God and the Masters that they have integrated their learning and are ready to move forward.

It is not a judgment, rather simply about asking:

"Are we ready to embrace more mastery and take on more responsibility?"

You will find that you are presented with the "old", perhaps dressed up as something new, and you have to make a choice. You are being tested to see if you will choose love and embrace the new or go into fear, doubt, denial, resistance... and go over some old learning again. Now is the time to be vigilant with your spiritual practices.

You may be aware of attending meetings or interviews on the inner planes, which is an indication that you are being considered for greater service. Of course there is no personal recognition with the Masters.

There is only service and more service. The only thing they are interested in is your willingness and your capacity for selfless service. At this time, you can request a meeting with your inner plane mentor (at their convenience), which can take place in deep meditation. This is to review your progress and the weak areas needing further integration. At Wesak (the full moon in Taurus), the energies work with the Masters to set up the incoming flows of energy which will condition evolution and experience here for the next year, both individually and on the group levels of civilisation.

We are pushed by the planet to demonstrate proficiency in the real world,

to prove that we have integrated our lessons and have indeed become 'more love' in a real grounded way.

Many challenges present at this time each year.

If we choose to embrace a new way of being and thinking when faced with the opportunity to re-experience the ways of past livings, instead of succumbing to the temptation to indulge the old, then the Lords of Karma allow us to pass into new phases of learning, integration, activation and responsibility.

This is a time to be especially discerning.

It is a time to be open, but not completely, for the GOD Within will create its own knowing. No one is infallible. Everyone has some negative ego no matter how far up the spiritual ladder they are. It is part of being human. No one can or ever will be absolutely clear in all moments. Discernment is necessary at all times, with everyone, always and in all ways.

Someone expressing wisdom does not blindly open up to another. They accept all, deny nothing, reflect, yet do not grasp.

We must learn to use all as a reflection of truth yet some reflections are clearer than others.

We must learn to find our reflection of truth within the myriad of reflections around us.

Aquarius is not an Age of Great Spiritual Teachers, it is an Age of Great Spirits.

Be careful, dear friends, that you don't get involved with the old dressed up as the new. Sometimes the old presents and it is very obvious, yet often it is not. One way to really recognise the old is by recognising that feeling of familiarity, the feeling of being comfortable and cruisy.

The new is not like that.

The new is your line of most resistance and the heart will always take the line of most resistance.

Why? Because it enhances and increases your capacity to love.

If you take the line of least resistance, you are taking the line of being the same.

Familiarity offers no expansion, enhancement, or increase of your capacity to love.

To be able to love the unlovable is what it is all about.

As light-workers, as integrated masters in-the-making, we have a responsibility to meet head on that which is considered to be unlovable, assisting that to be integrated within the planetary psyche. On behalf of humanity we have to move beyond the petty judgments, considerations and illusions which are projected upon us and we must assist Gaia in her evolution. This is the way to embody the Christ principle.

The capacity for compassion is directly proportional to our ability to accept feeling without judgment.

We must learn not to judge feeling as pleasure or pain but allow feeling to simply 'be' feeling without judgment.

This is the great key to heart-mastery.

Heart open-ness is limited to the extent the heart has been broken without judging that experience.

In other words, our ability to surrender to the human-ness of experience whilst still practicing equanimity.

Equanimity is even minded-ness no matter if we are faced with pleasure or pain.

The agony and the ecstasy of loving is one of the great paradoxes of heart mastery.

The bandwidth between the two extremes is your level of heart mastery, of heart open-ness.

much love, Michael King
